

My school is Emmanuel Primary School.  
My school is small.  
There are many kinds of insects, because  
it is near a mountain.

**P1 Eugene**

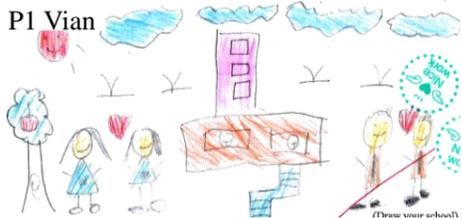

I love my school.  
I like going to the library to read books.  
I like to run in the playground.  
I love to read Chinese books in my  
classroom.

**P1 Jarvis**

My name is Vian. I study at Emmanuel  
Primary School. I am in P1. My school is  
not big, but it is so warm.

**P1 Vian**

Emmanuel Primary has six classrooms  
and 149 students. There are eighteen  
teachers. Miss Chan is teaching us  
Chinese. Mr. Lam is teaching us English  
and Putonghua.

Quentin is my best friend. At recess, I  
always play with him. He is very cute.

**P2 Carson**

Emmanuel Primary School is the name of  
my school. It has six classrooms, a  
playground, a library, a theatre, a  
computer room, and a hall. There are  
149 students. Ching Ying is my best  
friend in the class. Miss Chan, the  
Chinese subject teacher, is my class  
mistress. I love my school very much.

**P2 Lydia**

In the year 2076, our school will be 120  
years old! I think the number of students  
will be over two million.

The students will come to school from  
8:00 am to 4:00 pm. We will have an  
airport, a supermarket, a restaurant, and a  
hotel. We will have Japanese, French,  
and Malay lessons. Our homework will  
just be about how to play computer games  
and explore the world.

# EPS Express

2015, 60<sup>th</sup> Anniversary Edition

We will have 361 school trips, but they  
will all be sports days. We will not have  
any school bags, textbooks, or pencil  
cases. We just need to bring a computer  
and an iphone.

After school, some boys will play  
computer games and some girls will play  
on their iphones, and others will do  
'homework'.

If we are naughty, we will need to help all  
the people collect rubbish as punishment,  
and if some boys are very naughty, the  
teacher will throw him into a haunted  
house!

I love this future school. Do you think it  
would be fun?

**P3 Chanson**

In 2076, our school will have a big change.  
Our school will be relocated at the seaside,  
with more classrooms and a bigger  
playground. There will be no more  
mosquitoes, and it will be great!

Students will not need to carry a heavy  
schoolbag to go to school, because we  
will study by computer programs and do  
e-homework.

There will be no change in school times  
and subjects, but there will be twelve  
classes, and robots will work at the kiosk  
of the school.

The punishment for students will be  
cleaning of classrooms and toilets for a  
month.

Students will be happy to go to school  
because there will be two lessons of  
playing with toys every day, and two field  
trips every month!

**P3 Morrie**

In 2076, I think that Emmanuel Primary  
School will be the biggest school in the  
world. At that time, it will have sixty  
classrooms. They will include an art  
room, a music room, a tuck shop, a  
common room for lunch, a library, a  
computer room, a space room with  
telescopes, a rooftop, and a big  
playground for playing things such as  
football, basketball, and rope skipping.  
Moreover, it will have a large swimming  
pool, which can be used for Olympic  
competitions.

It will have more than one-thousand  
students. It will have many subjects:  
Chinese, English, Maths, Art, Music,  
Sports, Liberal Studies, and Science.

We will not have homework in 2076.

All students will be free and never  
punished.

We will go on school trips every week, to  
places such as Sai Kung and Stanley.

The start time will be 9 am and the finish  
time will be 10 pm, so we can sleep in the  
school and live together happily.

**P4 Christy**

This year, there are twenty-six or  
twenty-seven students in a class. In the  
year 2076, maybe there will be thirteen  
students in a class!

In 2015, there were no robot teachers, but  
maybe in 2076 there will be many, and the  
robot teachers will cook delicious lunches  
for the students! Maybe they will even  
make desserts, like ice-cream or  
strawberry cake!

In 2076 there will be shops in the school  
and even hotels for teachers or students!

But, bad news: in 2076 there will be a  
hundred pieces of homework! It will  
take ages to finish the homework!

The school trip may be to a fun park or  
Disneyland. Or there may be an airport in  
the school so that teachers can teach  
students by bringing them to different  
places in the world!

**P4 Harriet**

After another sixty years, our school will  
not physically exist anymore. I believe  
school will become more like  
'cyber-learning' instead of face to face  
teaching. Students will still need to go to  
school on the weekdays, but will be more  
on lessons of discipline and  
communication.

With a shorter time staying in school, all  
the formal subjects, like English, Chinese  
and Math, will be taught through the  
internet. All the homework will be done  
on the computer and sent to the teacher  
through the internet.

The school can still check on all the  
students' health by monitoring their smart  
bracelet that they carry, so they will  
realize whether the students have enough  
exercise and healthy food every day.

Punishment will not be allowed anymore,  
but it will be automatically reported to the  
parents if they do anything wrong at the  
school.

**P5 Rocky**

In 2076, our school will be one-hundred  
and twenty years old. But it will be new.  
Everything will be new!

First, the uniform will change; you can  
wear any kind of clothes you like.

And there will be forty-nine students in  
each class, but our new school will be  
very relaxing. Why will it be so relaxing?  
Because there will be a huge bedroom in  
each classroom. When you get tired, you  
can sleep there. And there will be a library  
on each floor! And each library will have  
millions of books!

The students will only need to go to  
school for three hours a day, from 9 am to  
12 noon. And there will just be one lesson  
a day of Music, P.E., Bible reading, or Art.  
One hour for learning, one hour for  
playing, and one hour for after school  
activities.

There won't be any punishment, and the  
school will have so many trips, maybe  
even twice a week!

The most exciting thing is homework!  
P1-P3 will just have two pieces of  
homework, one sport, and one reading.

And P4-P6 will have three, one sport, one  
reading, and one i-learner. But the  
i-learner will be a new version: you don't  
need to do the exercise, but you still have  
one-hundred coins every day. Cool!

I hope our school will be as cool as this. I  
hope I can see the brand new school after  
sixty years!

I wonder what our school will be like in  
the year 2136...

**P5 Sue Sue**

In 2076, every student will have their own  
computer in their classroom, and  
everyone will have their own private area  
with short walls.

Every month, students will go on school  
trips to different planets, such as the moon,  
Mars, Neptune, or Mercury.

Students will not have Chinese and  
English lessons, but they will have mobile  
apps design, science, and animal care  
lessons.

Also, we will not need to wear uniforms  
or do more than three pieces of  
homework.

After lunch, we will have two hours to  
sleep and after sleeping, we will have  
time to play many card games.

This would be my dream school. I hope  
you like it.

**P6 Chung Hiu Lam**

**P6 Alan Chong continues  
on the other side of the paper.**

EPS in the year 2076:

Emmanuel Primary School will have a lot of changes.

First, the school will be bigger than now.

There will be 18 classrooms. P1-6 will have three classes each, and there will be more teachers than now.

Next, the school will have many subjects such as Chinese, English, and General Studies, and there will be a new subject!

It will be building! In the future, people will be smarter than nowadays, so they will learn to build homes.

In the future, we will have a little bit of homework. It will be done on the computer, because in 2076, people will be very good at science.

There will be no punishment at the school, because the students in the future will be very well behaved.

Finally, in the future, the people will go to another country such as the UK or USA.

The school will have a good future.

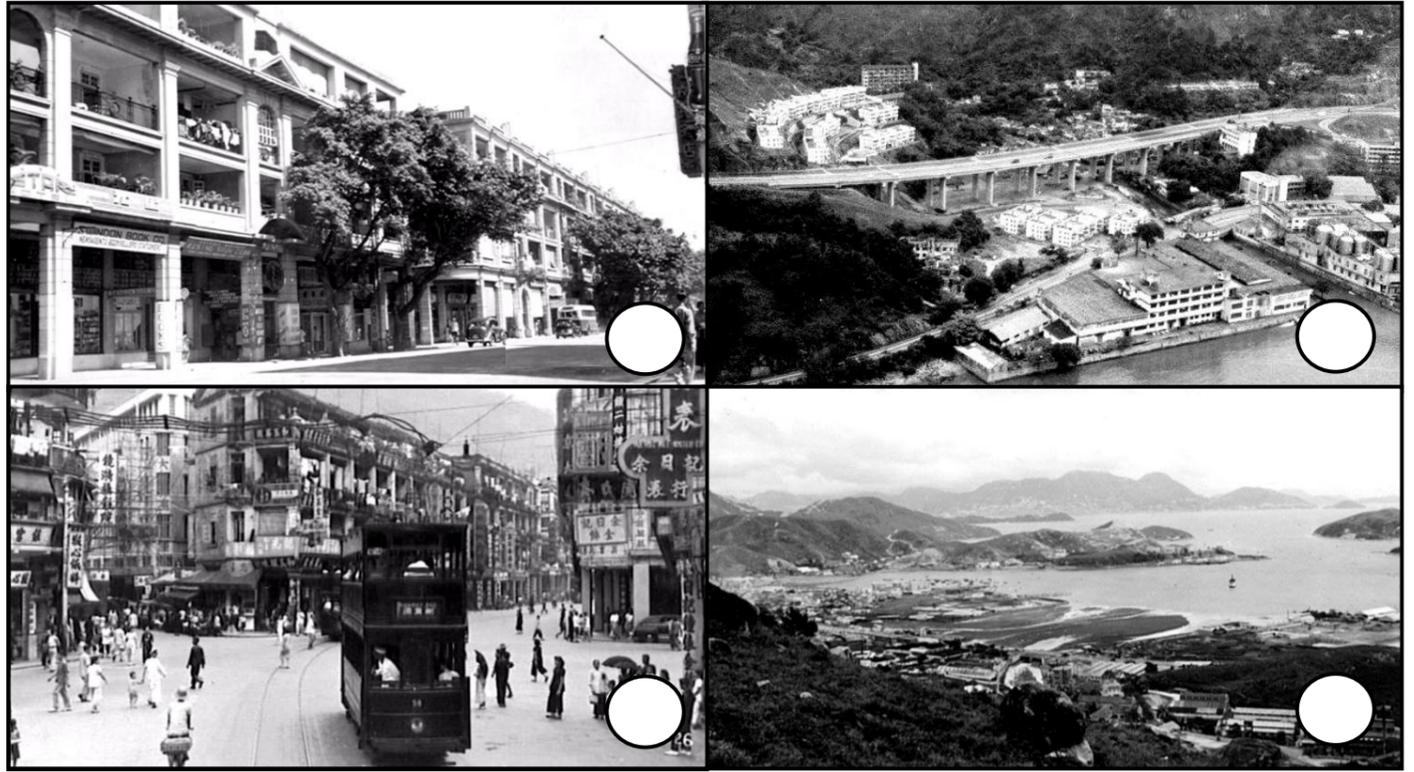

P6 Alan Chong

Here are some old pictures of Hong Kong.

Can you guess where these places are?

Put the correct letter in the circle.

- A) Hong Kong Island
- B) Kowloon
- C) Tsuen Wan
- D) Sham Tseng

I would like to recommend Midnight on the Moon by Mary Pope Osborne. It's the 8<sup>th</sup> book in the Magic Tree House series.

Annie and Jack go into space to find the last M thing, but... they only have two hours of air in their spacesuits! Do you think they can find it before their air runs out? Find out in our library!
